

Our Air Tightness Testing comes with advice on how to improve Energy Efficiency

*From the 1st of July 2009
Air Tightness Tests are required on
all new one off Domestic properties,
where the work commences or
takes place on or after this date.*

All Air tightness Assessments and Surveys are carried out by Experienced and Qualified personnel who are Authorised Energy Assessors, fully Accredited by SEI.

Energy Surveys Ltd. are now offering Air Tightness Testing

Air Tightness Testing – *What is it?*

Air tightness testing helps to identify unplanned/unintentional air leakage paths through gaps, cracks, etc. in the building envelope. Air Tightness testing is also known as Air Permeability Pressure Testing or Air Leakage Testing.
